The curriculum examines the physical, biological, and behavioral foundations of human communication. Courses focus on the study of variation in speech, language, and hearing processes, and seek to apply that knowledge to identifying, preventing, and managing disordered speech, language, and hearing.

The College of Liberal Arts Advantage: More Than a Major

When you study Speech-Language-Hearing Sciences at the University of Minnesota, you gain the added advantage of a College of Liberal Arts education. At CLA, the liberal arts mean you get more than just a degree in one major or another; it means you will be exposed to different areas of study, to different ways of thinking and learning. In fact, the liberal arts teach you how to learn—how to ask the right questions, how to problem solve, and how to innovate. The liberal arts prepare students for the complexities of our world, because here at CLA you will study not just, say, politics or art but also where politics and art intersect, where science and ethics intersect, where economics and the environment intersect.

Meet Our Students
As graduation nears for many students, the last semester is a time to reflect on memories at the University. Graduating senior Kaitlin Trefethen looks back on the skills and experiences she gained through speech-language-hearing sciences and how she can take that knowledge into the future.

Read more about Kaitlin's story, and learn more about our undergraduate program.

Student Experiences

Internships: Gain Valuable Experience in the Twin Cities and Beyond

Did you know? CLA Career Services has its very own internship reflection course! Students taking an internship can use this course to reflect on ways that their work experience is preparing them for successful careers - and receive credit for the work.

Learning Abroad: Prepare to Lead in a Global Economy

“See the world to learn about yourself in order to better serve others.”
—Kathryn Kohnert, Professor Emeritus, Speech-Language-Hearing Sciences

Learn more about study abroad for Speech-Language-Hearing Sciences majors.

Undergraduate Research: Turn Curiosity into New Knowledge

SLHS offers undergraduate students research opportunities with SLHS faculty members or University-wide faculty. Students can gain valuable research experience as undergraduates by participating in the Undergraduate Research Opportunities Program (UROP), and honors students can pursue faculty-directed research as part of their honors thesis. Discover your research opportunities within
our department.

Difficulties in language development can cause children to fall behind academically and socially. Through her research with early language intervention and children with neurodevelopmental disorders, Dr. Liza Finestack is working to improve clinical practices and keep children from this population on track.

"My whole college experience changed because of one email." Sarah Rosen, a recent graduate of the speech-language hearing sciences department, fell in love
with the world of speech-language-hearing sciences by taking a risk. That one email gave her the experience she needed to begin a career with passion.

Read more about Sarah's story.

CLA Graduates: Successful Careers and Purposeful Lives

CLA graduates succeed in many different careers — law, health care, medicine, business, government, teaching, advertising, arts and entertainment, international relations, and more — precisely because they understand how to navigate a complex and interconnected world. As our alumni explain below, “Being a good employee means being curious, and continuing to evolve, and learn, and educate yourself, and I can think of no stronger foundation for doing that than a liberal arts education.

“An education in the liberal arts is a springboard to lifelong career success”
-- Dean John Coleman
