Economics emphasizes critical thinking and the understanding of basic economic principles.

The B.A. gives students a solid background in economics, is the least quantitative of the three economics majors, and provides excellent preparation for students interested in working immediately after graduation or considering law school.

The B.A. - Quantitative Emphasis adds basic quantitative training (in calculus, linear algebra, and econometrics) and best suits students considering a career in field research or graduate work in business administration.

The B.S. is for students interested in graduate study in economics or in a career where quantitative economic analysis plays a significant role. The strong quantitative component in this degree emphasizes multivariate calculus, linear algebra, and econometrics.

Students choose from courses in comparative economic systems, economic theory, econometrics, economic development, game theory, industrial organization, cost-benefit analysis, environmental, financial, international, mathematical, monetary, public, and labor economics.

**The College of Liberal Arts Advantage: More Than a Major**

When you study Economics at the University of Minnesota, you gain the added advantage of a College of Liberal Arts education. At CLA, the liberal arts mean you
get more than just a degree in one major or another; it means you will be exposed to different areas of study, to different ways of thinking and learning. In fact, the liberal arts teach you **how to learn**—how to ask the right questions, how to problem solve, and how to innovate. The liberal arts highlight the complexities of our world, because here at CLA you will study not just, say, politics or art but also where politics and art intersect, where science and ethics intersect, where economics and the environment intersect.

**Meet Our Students**

“Economics is a tool to look at public policy from a more objective view,” says Dasom Ham, an undergraduate economics major at the University of Minnesota. After three years at the University, Ham is ready to pursue a PhD in economics and influence public policy.

[Read more about Dasom's story](#), and [learn more about our undergraduate program](#).

Amy Ko recently completed her academic journey with the University of Minnesota and embarked on her professional journey with them, too. Thanks to her impressive
education, passion for data science, and determination for success, Ko is able to bring valuable experience and enthusiasm for analytics to her new career.

Student Experiences

Learning Abroad Options in Economics: Prepare to Lead in a Global Economy

“Nothing else in your college experience will expand your horizons—truly educate you—as much as a year of study abroad. See me if in doubt; go if you can.”
—Ed Foster, Professor Emeritus, Department of Economics

From the beginning of his academic career, economics senior Kazimier Smith has been able to dig in to research. “I think a lot of times research ideas come from places you wouldn’t think they come from,” he says.

Read more about Kazimier's story, and learn more about study abroad for Economics majors.

Undergraduate Research: Turn Curiosity into New Knowledge

The Department of Economics and Heller-Hurwicz Economics Institute are seeking applicants on a rolling basis for paid undergraduate research opportunities. A very limited number of students will be selected to assist faculty with their ongoing research endeavors.

Meet Our Faculty

The University of Minnesota was proud to present Professor Anne Krueger, former chief economist at the World Bank, with an honorary degree for her invaluable contribution to economics. Her mentorship has inspired many students.

Meet Our Alumni

CLA Graduates: Successful Careers and Purposeful Lives

CLA graduates succeed in many different careers — law, health care, medicine, business, government, teaching, advertising, arts and entertainment, international relations, and more — precisely because they understand how to navigate a complex and interconnected world. As our alumni explain below, “Being a good
employee means being curious, and continuing to evolve, and learn, and educate
yourself, and I can think of no stronger foundation for doing that than a liberal arts
education.

“An education in the liberal arts is a springboard to lifelong career success”
-- Dean John Coleman
